

Keeping you safe, respecting the planet

The more we are aware of our impact on the planet, the more we can do to lessen it. We have made changes across every part of our operation. Some are small, some are significant - but all of them make for a happier, healthier planet.

It's a team effort:

we're in this together, the whole Knights team, the whole world. Help us make a difference.

Ethical sourcing:

We don't just pick our suppliers based on the cost of their products. We select them when we know their standards are high and their workers are respected.

Perfectly packaged:

Maybe you've not noticed that all our packaging has recycled content and we have invested in machinery to reduce packaging. Why would you? It does a perfect job.

Making things last:

it's become a throwaway world. We don't like that. We find workwear that's tough enough to last and create lasting partnerships with suppliers and customers.

Cutting waste:

it's become an ingrained habit to scrutinise everything we do. We've become very, very frugal and are experts at reducing, reusing and recycling.

In-house and in control:

logos and embroidery are all done in house. There's no waste moving garments to a third party, and we know all the materials we use are ethically produced.

Exacting standards:

Why not champion sustainability? Dress to impress; from shorts and polos to boots and overalls. Garments certified to the Global Recycled Standard, Oeko-Tex approved fabrics, footwear verified by the Vegan Society and sustainable biodegradable gloves.

Wear green:

or blue, black or yellow. We've got a fantastic range of workwear made from recycled materials, designed to give you and our lovely planet the right type of protection.

Saving energy:

Across the operation, we're ensuring we don't waste a single watt. From LED Lighting, strip curtains behind roller shutter doors and moving to hybrid vehicles - we save energy wherever we can. Even the kettle.

Bottles into boots

Who would have thought that all those empty plastic bottles could be so brilliant for protecting your toes? So comfy to wear all day, so light, so grippy, oil-resistant and anti-slip, and anti-static?

Stop being surprised. Try a pair.

12 PLASTIC BOTTLES
IN EACH PAIR
